SUMMARY

AI Team Lead running a cluster of 7 engineers at a consulting firm. I own 15 internal AI products, have delivered 13 client projects, and won 5 deals through solution architecture and pre-sales. My work ships to production — the contract extraction system I built reduced processing from 260 hours to 26 minutes and turned a 4-week PoC into a 6-month engagement.

EXPERIENCE

AI Team Lead

Oct 2025 – Present

Consulting Firm · Chennai (Remote UK/US clients)

Leading Cluster 5 (7 engineers) in AI Center of Excellence. Own internal AI products, architect client solutions, do pre-sales.

Team & Scope

- Manage 7 engineers across 4 concurrent client projects (PE firms, manufacturing, SaaS)
- Technical direction for internal AI platform stack (enterprise chat, backend engine, consulting agent)
- Hiring (16 interviews conducted), performance reviews for 4 direct reports

Products I Own (15 total)

- **Enterprise AI Assistant** — Chat platform for 200+ users (SharePoint, Power BI, CRM). I'm product owner.
- **AI Backend Platform** — Multi-LLM, multi-workspace, governed. I own architecture.
- **Consulting Agent** — Memory-driven assistant (LangGraph, MCP, Teams/SharePoint/DevOps)
- **Fabric MCP Server** — Custom MCP extending Fabric with Excel export, dashboard generation
- Plus: AI Playbook, Power BI Semantic Assistant, MCP Integrations, AI Data Dictionary, AI Proposal Writer

Pre-Sales Impact

- Won 5 deals through solution architecture and technical pre-sales
- Created proposals/SOWs for PE firms, manufacturing, SaaS clients. When client asks "how would this work?" — I answer.

AI Engineer → Product Lead

Apr 2024 – Oct 2025

Same Firm

> **Contract Extraction — My Biggest Reference**
> **Problem:** 200-page contracts, pricing in nested tables, 260 hours manual extraction per batch. Previous OCR failed.
> **Solution:** PaddleOCR (table detection) + Qwen 7B (extraction) + confidence-based human routing.
> **Why not GPT-4?** $0.03/page × scale = budget rejected. Small model was accurate enough, 15x cheaper.
> **Result:** 260h → 26min. 85% straight-through automation. 4-week PoC → 6-month engagement.

- AI architecture for PE firm investment workflows (Claude Enterprise + MCP)
- Contract insights chatbot for waste management company
- Launched enterprise chat platform core epic (Nov 2024), built AI backend architecture

Data Engineer

Apr 2023 – Apr 2024

Same Firm

- Medallion architecture: 5M+ records/day (dbt, Redshift, Azure Data Factory)
- SCD Type 2 across 20+ entities, data quality monitoring
- First client delivery work. Learned: AI without clean data is expensive guessing.

Software Engineer

Feb 2022 – Apr 2023

Same Firm

APIs (Node.js, NestJS, FastAPI), ETL pipelines (1M+ records/day), Docker deployments (60% faster releases).

Full Stack Developer

2017 – 2022

Various Companies · Chennai

C#, .NET, SQL Server. Enterprise systems for retail and services.
