SATHISH KUMAR V

AI Architect | Data Engineer

Chennai, India | +91 8056770991 | sathishkumar05@gmail.com
LinkedIn | GitHub | Medium | Portfolio

PROFESSIONAL SUMMARY

Versatile technology leader with 6+ years of progressive expertise across three critical domains: full-stack development, data engineering, and AI architecture. Unique career trajectory demonstrates adaptability and depth-began as C# .NET developer, advanced through full-stack engineering (5+ production applications), mastered data engineering (5+ enterprise platforms), and now architect production AI systems (5+ intelligent solutions over 2.5 years). Excel in hybrid roles spanning Project Manager, Solutions Architect, Technical Lead, and hands-on Developer, bridging business strategy with technical execution. Specialize in Azure AI Foundry, AWS Bedrock, and RAG architectures, consistently delivering solutions that reduce operational costs by 40-60% while achieving 85-90% automation rates. Proven ability to translate complex AI capabilities into tangible business outcomes through end-to-end ownership-from initial architecture to production deployment.

TECHNICAL SKILLS

AI:	Azure AI Foundry • AWS Bedrock • RAG • LangChain • LangGraph • Agents • MCP • Databricks Agents • Agentic AI • PaddleOCR • Vector Databases (Chroma, pgvector)
Data Engineering:	dbt • Azure Data Factory • Amazon Redshift • Databricks • Microsoft Fabric • SQL • Matillion ETL
Full Stack:	Python • TypeScript • JavaScript • C# • Next.js • React • Angular • Node.js • NestJS • FastAPI • .NET Core
Cloud & Tools:	Azure • AWS (Textract, Kendra, Bedrock) • Docker • Git

PROFESSIONAL EXPERIENCE

JMAN Group, Chennai

Feb 2022 – Present (4+ years)

Solutions Consultant

Oct 2025 – Present

- Architected AI solutions for 5+ enterprise clients, delivering intelligent automation systems using Azure AI Foundry and AWS Bedrock
- Led technical design of Agentic AI systems and RAG architectures, reducing client operational costs by $2M+ annually
- Designed document intelligence platforms using Amazon Textract and Kendra, processing 10K+ documents monthly
- Mentored team of 10+ engineers on AI best practices and cloud architecture patterns

Solution Enabler

Apr 2024 – Nov 2025

- Engineered contract extraction platform reducing processing time from 260 hours to 26 minutes using PaddleOCR, GPT-4, and LangChain with 85-90% automation rate
- Implemented RAG chatbot with vector databases (Chroma DB, Postgres pgvector) serving 1K+ daily queries
- Built enterprise data platform processing 5M+ records daily using dbt, Azure Data Factory, and Redshift
- Developed full-stack applications with Next.js, React, and NestJS, deployed to production serving 10K+ users

Senior Software Engineer

Apr 2023 – Apr 2024

- Optimized ETL pipelines using dbt and Azure Data Factory, cutting processing time in half while maintaining high data quality
- Developed complex data models in Amazon Redshift handling 2M+ records with significantly improved query performance
- Built full-stack applications using Angular, React, and Node.js with enterprise-grade reliability
- Implemented comprehensive data quality monitoring, dramatically reducing data incidents

Software Engineer

Feb 2022 – Apr 2023

- Developed 15+ RESTful APIs using Node.js and NestJS, handling 100K+ requests daily
- Implemented ETL pipelines with Azure Data Factory processing 1M+ records daily
- Containerized applications using Docker, significantly reducing deployment time
- Built responsive UIs with Angular and Next.js, substantially improving user engagement

Elroi Software Solutions, Chennai

Sep 2021 – Feb 2022

Full Stack Developer

- Developed enterprise applications using C#, .NET Framework, and SQL Server for 500+ users

- Built web applications with ASP.NET MVC and Entity Framework, optimizing page load performance

Qserve UAE, Chennai

Aug 2020 – Nov 2020

Full-Stack Developer

- Developed Retail Management System using .NET Core and SQL Server, managing 10K+ transactions monthly

RmKV Computask Pvt. Ltd., Chennai

Jul 2017 – Aug 2018

Software Developer

- Maintained enterprise ERP system for RmKV Group managing 20+ company locations with 1K+ daily users

KEY PROJECTS

Contract Intelligence Platform | Enterprise Client

Technical Lead | Published on Medium

- Engineered AI-powered contract extraction system achieving 85-90% straight-through processing automation
- Built multi-stage pipeline using PaddleOCR and Qwen SLM for complex table extraction from 200-page contracts
- Deployed GPU-accelerated inference on AWS EC2 with S3 storage integration for scalable document processing
- Integrated Salesforce and MongoDB for seamless data flow and contract lifecycle management

Tech: FastAPI, AWS EC2 GPU, PaddleOCR, Qwen SLM, S3, Salesforce, MongoDB

AI Research Chatbot | Healthcare Client

Project Manager + Technical Lead

- Solved research bottleneck where clinicians spent hours manually reading papers from PubMed, Google Scholar, and Semantic Scholar
- Built RAG-based chatbot that retrieves, synthesizes, and curates research findings from multiple academic sources via LLM
- Implemented intelligent caching with vector database indexing-subsequent searches with same terms retrieve instantly without re-extraction
- Serving 1K+ daily queries, dramatically reducing research time from hours to minutes

Tech: Next.js, Chroma DB, Postgres pgvector, LangChain, OpenAI API, PubMed API, Google Scholar API, Semantic Scholar API

Enterprise Data Platform | Private Equity Client

Project Manager + Data Engineer

- Built medallion architecture data platform delivering 3 critical business reports: ARR, Pricing, and Price List
- Implemented SCD Type 2 for complete version history tracking across 20+ integrated data entities
- Designed and orchestrated end-to-end data pipeline processing 5M+ records daily with optimized Redshift models
- Integrated data from 20+ source systems and delivered insights via Power BI dashboards for executive decision-making

Tech: dbt Cloud, Amazon Redshift, Azure Data Factory, Power BI, SCD Type 2

EDUCATION

Master of Computer Applications (MCA) | University of Madras IDE | 2017-2020 | 70%

Bachelor of Computer Applications (BCA) | Jairam Arts and Science College | 2014-2017 | 66%

Higher Secondary School (HSS) | Velasamy Chettiar HSS | 2014 | 65%

Secondary School Leaving Certificate (SSLC) | Velasamy Chettiar HSS | 2012 | 66%

PUBLICATIONS & CERTIFICATIONS

- **Medium Publication:** "Contract Intelligence at Scale: How OCR-LLM Turned 260 Hours Into 26 Minutes" (2025)
- Active technical contributor on AI, LLMs, RAG architectures, and data engineering topics
